

FTTx *PORTABLE FIBER POLISHER*

Developed for 'In-the-field' and 'Retro-Polishing' connector/termini/contact polisher from ULTRA installation professionals for the FTTx, LAN, CA

HIGH PERFORMANCE

Industry-standard polishes are readily achieved due to a robust design and build.

The polisher can be held at any desired angle during operation. This allows for true portable operation in small workspaces, cross-connects, fiber nodes and wire closets. The unit can be operated with either a battery pack or a power supply (both included with standard package)

READY TO GO

The standard package for the unit incorporates all the items you need for a fully configured system:

- Portable Polisher
- 5 Resilient Polishing Platens
- 12V Converter
- Battery Pack & Charger
- Carrying Case

WORKHOLDERS

2 and 4-position workholders are available for a wide variety of connectors, termini and contacts. If we don't have the workholder you need, we can design and make you one.
